RE: Manhole Inspection

Dear Mr. Warren:

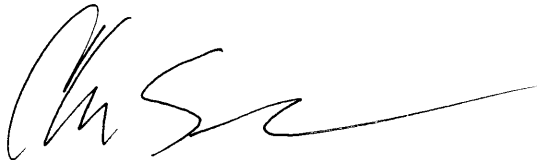

We recently inspected two sanitary sewer manholes in the North Kent Sewer Authority system originally coated with your products in the year 2000. The manholes were coated with Warren Environmental's P-301, S-301, and T-301 products and the coatings appeared to be in perfect condition.

We are very impressed with the quality and workmanship of your product. Prein&Newhof will continue to use your product when necessary.

If you have any questions, please call me.

Very truly yours,

**Prein&Newhof**

A handwritten signature in black ink, appearing to read 'CS', with a long horizontal flourish extending to the right.
